(a) Open-loop accuracy
physical
emotional
child net
caregiver net
trained value
held out
RMSE of coupling estimate
coupling parameter ε
(b) Input ablation
physical
emotional
median R^2, $0.1 \leq \varepsilon \leq 0.67$
all inputs
no distance
no own state
all inputs
silent vocal
no own state
(c) Closed loop
need correlation (closed loop)
ambivalence ε_{Am}
(d) Closed loop
analytic coupling
learned coupling
avoidance ε_{Av}
